

About Us

About Us

From waist length flow to pixie cut flare, you marvel at the ravishing hairstyles on the runways of NYFW, VS Angel, Paris and Milan. You flip through the pages of the high-fashion magazine shoots, all the while coveting every wave and pin-straight style.

Now those lovely locks can be yours with Runway Tools.

It's time to put down those drug store hair styling tools (the ones that damage and fry) and step out onto the runway.

Runway Tools were created by professional hairdressers to put high quality styling into the hands of every woman.

Since they're from the minds of actual stylists, these ergonomically comfortable, durable and high-tech tools address salon chair concerns (the wear-and-tear of all day, every day use) while also helping you achieve runway ready style.

Styling once reserved for the professionals is now for you, as you discover a world of staying power—easy-to-create beautiful curls and elegant straight strands as well as tools that endure for long-term use.

Smart. Elite. Sexy. It's Runway your way.
