Description

This premium mid-cut trainer turns a classic style on its heels with its modern, polished look and smart details. The lightweight nature gives serious weight to the notion of comfort through a contoured footbed and blown rubber outsole. It's the right mix of shine and sueded subtleties to put you on top of your game.

Product Details

The Tsubo® Resnik utilizes the following technology:

- Dual-density polyurethane footbed
- Contoured footbed with soft polyurethane cushioning next to the foot
- Perforations for enhanced air circulation
- Flexible removable sockliner
- Heel shock absorption and foot stability

Description

Cousin to the classic saddle shoe, this mid-boot's geometric patterns would make modern architects proud. Contrasting the stiff feel of most 9-to-5 wear, the burnished premium leather upper is paired with a contoured foam footbed and crepe outsole to provide unmatched comfort through heel shock absorption and enhanced air circulation. The patchwork design toes a spirited line between dress and casual.

Product Details

The Tsubo® Alderan utilizes the following technology:

- **Contoured footbed with soft polyurethane cushioning next to the foot**
- **Perforations for enhanced air circulation**
- **Flexible, removable sock-liner**
- **Heel shock absorption and foot stability**

Description

Channel a retro vibe with this luxurious yet rebellious motor boot designed by Timo Weiland for Tsubo. The comfort foam and cushioning EVA footbed kick high heel pain to the curb, while the chunky industrial aesthetic boosts height and confidence. Whatever your arena, your inner rock star will thank you.

Product Details

The Tsubo® Braden utilizes the following technology:

- Latex foam for soft comfort
- Additional latex foam pods at forefoot and heel pressure points
- 2 piece insole board with EVA foam for comfort and cushioning
- Steel shank for support

Description

Take a peek at this feminine spin on a mountaineering must-have. The Hadley's EVA and latex foam footbed and rubber outsole ease every step through shock absorption and comfort contouring. Your fashionable side covets the slight wedge and cozy fabric cuff, both perfect for when the mountain you're climbing is in an urban jungle.

Product Details

The Tsubo® Hadley utilizes the following technology:

- EVA foam for comfort and shock absorption
- Latex foam for soft comfort
- Additional latex foam at forefoot pressure point
- 3 piece insole board for added flexibility

Description

Kick classic up a notch with the slick profile of this sculptural mid boot. The design breezes you through your day with rubber bushing details for shock absorption, supportive memory foam and a PU outsole for comfort, and ground-hugging rubber forefoot. A walk-on-air wonder, the Kemma is savvy style, day or night.

Product Details

The Tsubo® Kemma utilizes the following technology:

- Leather sockliner with anti-bacterial treatment
- Supportive memory foam top layer with cushioning latex foam bottom layer
- Additional cushioning latex foam forefoot
- Steel shank and insole board for support
- Rubber bushing for shock absorption

Description

Business has never been such a pleasure since this fusion of modern and timeless styles. A dress shoe that wears like a sneaker, the single density footbed combines with the outsole's one-two punch of leather and rubber for unmatched comfort. Easy on both eyes and feet, there's a tailored twist—you can dress it up or down.

Product Details

The Tsubo® Winslow II utilizes the following technology:

- **Contoured footbed with soft polyurethane cushioning next to the foot**
- **Perforations for enhanced air circulation**
- **Flexible, removable sock-liner**
- **Heel shock absorption and foot stability**
