# The Magic of Micro-needling

*Let's get to the point. As we age, we lose collagen and elastin, the building blocks of radiant skin. MesoLyft's micro-needles and serum condition the skin's surface for a non-invasive boost back to beautiful. Inspired by the centuries-old European treatment Mesotherapy (the beauty secret of vitamin injections), this pain-free at-home treatment is a one-two punch against lackluster skin.*

*First comes the pump - perfectly measured drops of serum on the MesoLyft tip. Then the roller glides over the treatment area, as dozens of micro-needles exfoliate dead cells and push active ingredients into primed, thirsty skin. MesoLyft is time-tested technique, modern day formulas, and results-driven technology - all rolled into one.*

**SCIENCE.**

LOVE.

You could say we've reinvented the wheel. The easy-to-use MesoLyft device combines a rolling tip of micro-needles with a pump of area-specific serum. Mimicking expensive high-tech medspa treatments, it puts the power of science into your hands for both instant and long-term results. While MIT research prompted the creation of the micro-needle wheel, biochemists helped concoct MesoLyft's skin-saving formulas rich in vitamins, antioxidants and peptides. The device's needles meet the highest quality standards at MesoLyft's U.S. production facility.
